

## Testing of Protective clothing

– gloves, knee protectors, safety shoes and Respiratory protective devices

When you produce and sell personal protective equipment it is important that the device protect the end-user as intended. FORCE Technology will be glad to test your product to ensure that it fulfills the latest harmonized product standard.

We test or collaborate with other accredited laboratories of the testing of high visibility garments, garments for welding or protective garments against chemicals, flame, heat or charge decay as well as test of respiratory protective devices.

We offer FORCE Certification A/S NB 0200 as Notified Body when certifying.
